Art Unit: 2192

1. This action is in response to the amendment filed on 11/22/05.
2. Claims 1-5, 7-13, and 19-22 have been amended.
3. Claims 14-18, and 25-48 have been canceled.
4. Claims 23-24 have been canceled (See Examiner's Amendment)
5. Claim 49 has been added.
6. Claims 1-13, 19-22, and 49 have been allowed.
7. Drawings filed on 12/30/00 have been accepted by the Examiner.

#### **EXAMINER'S AMENDMENT**

8. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Jordan M. Becker, applicant's attorney on 1/12/06.

The application has been amended as follows:

***In the claims:***

**13. (Currently amended)** The method of claim 1 further comprising:

sending from the server to the client computer a plurality of key values, the key values identifying ones of the collection of executable blocks;

receiving a response at the server from the client computer indicating blocks identified by the key values that are already stored at the client computer; and wherein

sending the startup block bundle comprises omitting blocks stored already stored at the client computer.

**19. (Currently amended)** A computer system comprising:

a database storing a plurality of software applications segmented into a plurality of executable code blocks, each said software application's plurality of executable code blocks comprising a set of executable initialization code blocks;

a processor operatively coupled to ~~a network interface~~, to the database; and to a computer readable data storage ~~media~~ medium comprising instructions to configure the processor to:

form an initialization block comprising executable initialization code blocks for at least two from each of the plurality of software applications; and

send the initialization block to a client computer ~~operatively coupled to the~~ via a network interface ~~computer~~ to enable the client computer to execute the plurality of software applications in a streaming mode.

**20. (Currently amended)** The system of claim 19 wherein the data storage ~~media~~ medium further comprises instructions to configure the processor to:

~~monitoring~~ monitor execution of initialization code blocks at the client computer to determine a usage pattern; and

~~forming~~ form a new ~~startup~~ initialization block ~~bundle~~ based on the usage pattern.

**21. (Currently amended)** The system of claim 19 wherein:

the system further comprises a database ~~comprising~~ containing a plurality of user profiles, each user profile comprising security data to control usage of ones of the plurality of software applications by a respective user; and

the data storage ~~media~~ medium further comprises instructions to configure the processor to:

~~instructions to~~ query the database of user profiles to access security data associated with a first user;

~~instructions to~~ process the security data to determine application restriction data associated with the first user; and

~~instructions to~~ send the application restriction data to the ~~first~~ client computer.

***Cancel claims 23 and 24.***

***REASON FOR ALLOWANCE***

8. The following is an examiner's statement of reason for allowance:

The cited prior art taken alone or in combination fail to teach, in combination with the other claimed limitations, a method of transmitting executable software from a server to a client computer, the method comprising: forming a startup block bundle comprising blocks executable during initialization of the plurality of software applications, at least one executable block from each of the plurality of software applications being included in the startup block bundle; and sending the startup block bundle to a client computer to enable the client computer to execute the plurality of software applications in a streaming mode, as recited in the independent claims 1, 19, and 49.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

9. The prior art made or record and not relied upon is considered pertinent to applicant's disclosure.
